

Comparative Marketplace Raters

Comparative Marketplaces allow an agent to match a risk based on carriers' appetite and bridge data directly into their system – instantly returning status and price. While participation on any marketplace platform requires an agent subscription, AF Group and its licensed insurance carriers are currently integrated with the following:

- Ivans Distribution Platform (IDP)/Tarmika
- Semsee
- Vertafore's Commercial Submissions

If you have any questions, please reach out to your business development consultant or email agencyautomation@accidentfund.com.

All policies are underwritten by a licensed insurer subsidiary.
